

Unique solution developed by Dynaflex now alerts authorities about exam paper leaks in time

Vadodara, 6th Jan, 2014: In the wake of recent news headlines about instances of leaking of question papers in many colleges/institutions, the demands for '*tamper-evident*' envelopes have gone high. Now, many reputed educational institutions in the country have been stringent on implementing the use of such products. An ordinary envelope can be opened and re-sealed leaving no proof.

Dynaflex being a pioneer of this segment in India, director, Gaurav Vora on addressing the media during the press-conference said, "*These envelopes leave an irreversible mark if any one tries to tamper. It has been over a year since they were launched in India and the demand, especially from the educational sector, has been extremely promising.*"

Vora further adds "*Tamper-evident packaging materials have been widely accepted across Western countries and it is just a matter of time when such products find a strong foothold in India. Mass awareness about the existence and varied benefits derived from usage of such products needs to be communicated at grass-root level in India.*"

Currently the company supplies Confidential CD Cover, Confidential Manuscript Cover, Answer Book Cover and Practical Examination Mark Sheet with handle to Gujarat Technical University (GTU). The unique feature of these products combines a reliable special security closure and unique sequential number/bar coding, that makes tampering instantly and clearly visible.

Apart from GTU, other educational institutions using these envelopes are Gujarat University, Delhi University, NarseeMonjee (Mumbai), Manipal Education, Orissa Board among others.

When compared to the cost of re-examination, the cost of procuring a tamper evident envelope is in any way lesser taking into consideration student's career and the credibility of the institution.

These envelopes come in different shapes and sizes and are manufactured in high strength opaque grey or clear film of 75-100 microns. The investment and infrastructure required to manufacture such products rests with a handful manufacturer across the world and Dynaflex happens to be one among them.

In the age of smart-phones and digital era where keeping secret documents safe is probably one of biggest challenges, we were desperately looking for alternatives that promise us complete safety. Though, we had been following strict security measures as far as keeping the documents is concerned, to switch over to new-age concepts was the need of the hour. Dynaflex to us was a great respite. The tamper-proof security envelopes from Dynaflex have served the key purpose of keeping the sensitive documents like question paper, answer sheets and other office documents," said Professor Dr. Dakshya Prasad Nanda, President, Board of Secondary Education, Odhisa Board.

Documents like question papers, answer sheets etc. are very much sensitive in nature and there is always a fear that the conventional methods to keep them safe may fail. We were looking for some strong alternatives and that is when we got in touch with Dynaflex. Now we are not at all worried about the safety of these documents since the product which Dynaflex has offered is world class." said Shri Ashish R Apte, Controller of Examinations from Narsee Monjee Institute of Management Studies (Declared as deemed-to-be University)

Similarly Dr. P. Laxminarayana Rao, Registrar-Evaluation Manipal University, echoed his views. *"To keep the institutes' document in a complete tamper proof situation was the biggest challenge before us as we are known for our secrecy. The times have changed and so has the mind-sets at our institute where we have been evolving continuously. Gone are the days when we would put traditional lack seals on the paper cover thinking that the same is safe. Now we have adopted to the tamper-proof security envelopes which have helped to the great extent in keeping our credibility intact.*
