

Dynaflex develops tamper-proof envelopes for exam material

Eyes turnover of Rs 100 crore over next two years

Our Bureau

Ahmedabad, Jan. 9

Dynaflex Pvt Ltd, Vadodara-based manufacturer of tamper-evident plastic bags and envelopes, has developed special products for educational institutes and universities to keep answer sheets and the question papers safe.

The company has developed plastic bags and covers with unique barcode, which provides authenticity and allows the company to keep a track of each bag.

"These envelopes leave an irreversible mark if any one tries to tamper. It has been over a year since they were launched in India and the demand, especially from the educational sec-

tor, has been extremely promising," said Director Gaurav Vora.

The company supplies such covers and bags to Delhi University, Sikkim Manipal University, SNDT University, Jannalal Bajaj University, Narsee Monjee Institute of Management Studies (NMIMS), Mumbai, Gujarat University, Gujarat Technological University and other State education boards.

Answer sheets, OMR sheets and question papers remain tamper proof inside the bags manufactured by Dynaflex.

"Public service commissions, conducting competitive exams are also our customers," he said. PSCs in Rajasthan, Guja-

rat, Maharashtra and Karnataka are among its customers.

According to Vora, market for such application in India is around Rs 200 crore, while internationally it is around Rs 500 crore.

The company has invested around Rs 22 crore for setting up the plant and processing centre at Halol near Vadodara. The company is eyeing a turnover of Rs 100 crore over the next two years from the current Rs 40 crore.

Dynaflex gets around 10 per cent of its turnover from overseas by selling tamper evident covers for passports and applications in the banking, investigation and civil aviation.
